

RouterBOARD 411AH

Using the same superfast CPU as the RB433AH, the RB411AH is now just as fast.

The heart of this device is the new, faster Atheros 7161 CPU which makes this tiny device faster than any CPE in this price range.

RB411 includes RouterOS - the operating system, which will turn this powerful system into a highly sophisticated router/firewall or bandwidth manager.

One small device - with all the power of RouterOS. At a very special price.
